Практическая работа WebView

1. Добавил кнопки и элемент WebView

```
LinearLayout xmlns:android="http://schemas.android.com/apk/ 🔼 1
                                                                          activity_main.xml ~
                                                                         android:id="@+id/btn2"
       android:layout_width="135dp"
       android:layout_height="67dp"
       android:layout_gravity="center"
       android:text="ClashRoyaleWiki" />
   <Button
       android:layout_height="67dp"
       android:layout_gravity="center"
       android:text="DMCWiki" />
   <WehView
       android:id="@+id/wvMain"
       android:layout_width="420dp"
       android:layout_height="530dp"
</LinearLayout>
```

2.Добавил для кнопок действия переход по ссылкам

```
binding = ActivityMainBinding.inflate(layoutInflater)
setContentView(binding.root)

ViewCompat.setOnApplyWindowInsetsListener(findViewById(R.id.main)) { v, insetSystemBars = insets.getInsets(WindowInsetsCompat.Type.systemBars())
v.setPadding(systemBars.left, systemBars.top, systemBars.right, systemBars.right, systemBars.setS)
binding.btn1.setOnClickListener {
binding.wvMain.loadUrl( url: "https://dota2.fandom.com/wiki/Dota_2_Wiki")
}
binding.btn2.setOnClickListener{
binding.wvMain.loadUrl( url: "https://clash-royale.fandom.com/ru/wiki/Clash_F)
binding.btn3.setOnClickListener{
binding.wvMain.loadUrl( url: "https://devilmaycry.fandom.com/wiki/Devil_May_E)
}
binding.wvMain.loadUrl( url: "https://devilmaycry.fandom.com/wiki/Devil_May_E)
}
```

3.Результат
